

Did you know how many active ISO certification are there in your country and worldwide?

The information and facts in this report is a representation that is translated graphically using the inputs of the **Source reference data***. The graphical information includes demonstration and comparison of the world-wide survey including Australia's status for the three popular Certified Management Systems i.e. **QMS** | **EMS** | **OHSMS**

The graphical representation of the Certification shown in this report is effective 1993 until 2017 (from the latest available survey). This report is specifically created and scoped with information of worldwide regions (overview), East Asia and Pacific region and Australia in specific. Why? The originators' scope was to demonstrate graphically the status of active management systems to the readers of Australia in specific.

NOTE: Missing information of your country or any other regions? Please feel free to ask for a tailored information of your region and/or country. Inbox us on enquiry@qproaustralia.com.au
